DESCRIPTORS College Students; *Educational Research; *Higher Education; *Institutional Research; *Private Colleges; *Student Characteristics

ABSTRACT

In the fall of 1971, a survey instrument calling for respondents to give basic data about themselves (race, sex, age), to indicate their educational status (class in college), to indicate their educational plans, and to give other related information was administered to entering students in selected private colleges and universities throughout Florida. A copy of a printout of the survey results for each of the participating private colleges and universities was forwarded to the institutions in early 1972. Following the dissemination of these printouts, questionnaire responses for the total number of respondents in the participating institutions were analyzed according to sex, race, age, and other factors. This volume contains these analyses. (Author/HS)

The data contained in this book reflect the combined responses of students in the below named institutions that participated in the Fall 1971 administration of the statewide survey--Characteristics of Entering Freshmen and Transfer Undergraduates.

Florida Southern College
Lakeland, Florida

Jacksonville University
Jacksonville, Florida

Saint Leo College
Saint Leo, Florida

Stetson University
De Land, Florida

PREFACE

In the fall of 1971, a survey instrument calling for respondents to give basic data about themselves (race, sex, age), to indicate their educational status (class in college), to report their long-range educational plans, and to give other related information was administered to entering students in selected private colleges and universities throughout Florida. In some institutions, all or nearly all of the students participated in the survey; in other institutions. a sample of entering students was selected to take part in the survey.

A copy of a print-out of the survey results for each of the participating private colleges and universities was forwarded to the institutions in early 1972. Following the dissemination of the these print-outs, questionnaire responses for the total number of respondents in the participating institutions were analyzed according to sex, race, age, and other factors. This volume contains these analyses.

Two companion volumes were prepared, one reporting the survey results for the public universities, and the other reporting similar information for the public junior colleges and community colleges in Florida.

The results of the fall 1971 survey reported in this volume give a cross-sectional picture of students entering the private colleges and universities in Florida that participated in the survey that year. In using the volume, one should keep in mind that the total number of students in the survey does not represent the total number of students entering those private institutions in the fall of 1971. The number of students in the survey represents a substantial proportion of entering students, however, and therefore the percentage of responses to each item can be taken as indicative of the responses of the total population of students entering the private colleges and universities that took part in the survey in the fall of 1971.

This volume is the last in the series of published results of the survey sponsored by the Office of the Florida Board of Regents, titled "Characteristics of Entering Freshmen and Transfer Undergraduate Students." This series, begun in 1966, collected data from students entering Florida's colleges and universities during the period of the most rapid expansion in the state's history. These volumes mirror the group changes in the students' characteristics and should be useful as basic references for some years to come.
